

Building Beautiful Apps with the Web Modeler

Webinar Sept 28 2017

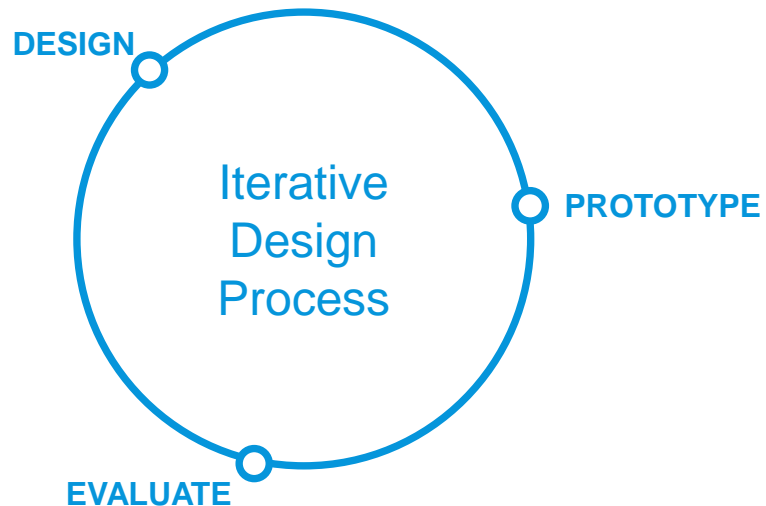

Daniel Dam
Senior Product Manager

Why the Web Modeler?

1. Easy to start with application development
2. Easy to create beautiful UIs for your apps
3. Easy to collaborate with non-technical domain experts

Enabling a design thinking approach

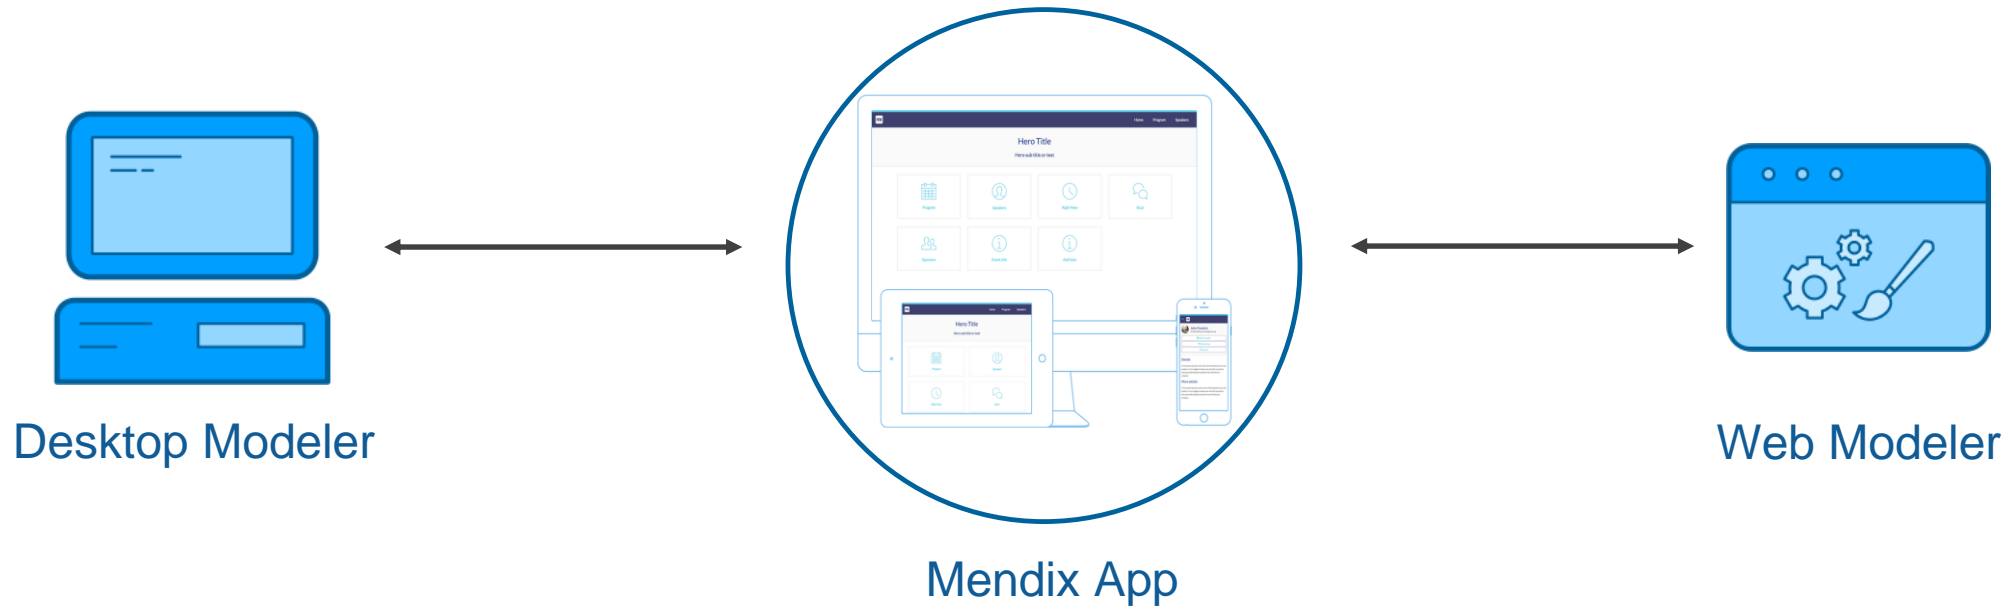

Deliberate collaboration: end users, business analysts, developers

- UI first approach
- Frequent iterations
- What you see is what you get

Theming flexibility

- Widget appearance
- Applying your company style

Now available in beta

Today's session

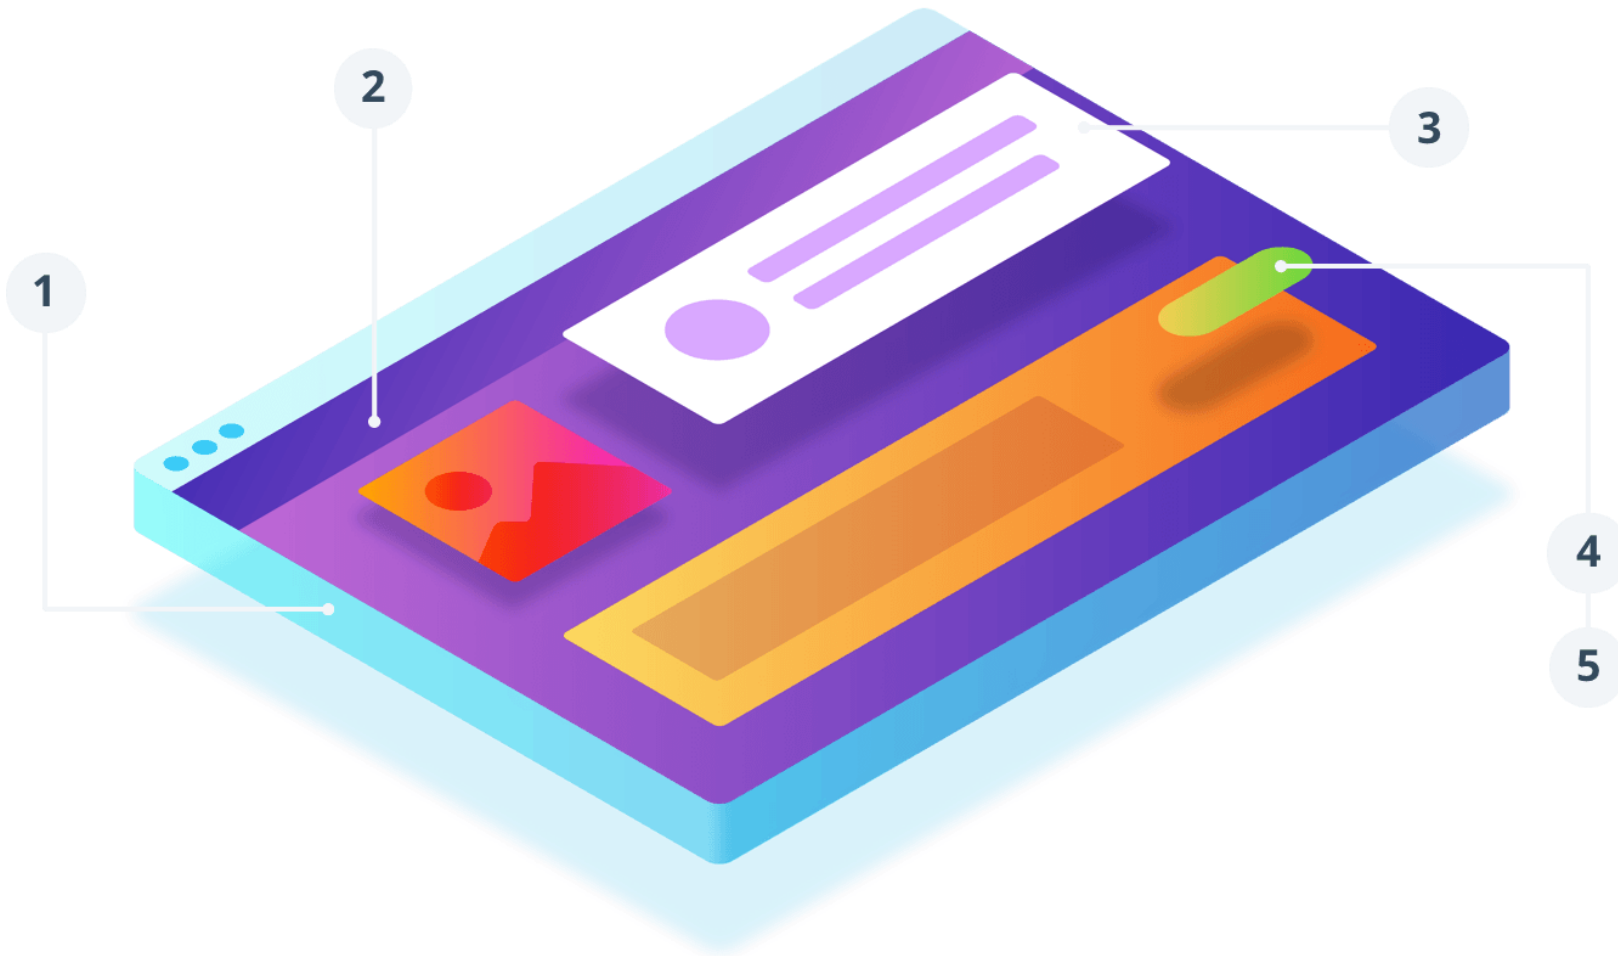

Creating a fully responsive app with the Web Modeler:

1. Create pages
 - using Atlas UI based page templates and building blocks
2. Create Domain Model and Microflows
3. Customize the app theme
4. Use content from the App Store

Atlas UI

Mendix Atlas UI is the design language that brings great user experiences to enterprise apps

1. Navigation Layouts
2. Page Templates

3. Building Blocks
4. Widgets
5. Design Properties

Thank you
